The F-16 Advantage:
Industrial Partnership with the Philippines

As a trusted partner to the Philippines for nearly 60 years, Lockheed Martin is proud to build on its legacy of delivering economic value to the Philippines through a comprehensive industrial participation proposal as part of our F-16 Block 70 offering. **The F-16 is a symbol of enduring partnerships and industrial collaboration** around the world and will serve as a **catalyst to help the Philippines achieve its defense and economic goals.**

» Designed to drive the Philippines Self-Reliant Defense Posture objectives forward, with focus on:

Developing long-term indigenous aerospace and defense expertise, empowering the Philippines to maintain and enhance its defense capabilities

Creating new job opportunities, fostering local economic growth and development

Stimulating local industries, promoting intellectual property creation and new business incubation through high-value technology transfer

» Proposed projects include:

- Establishing a **Lockheed Martin Innovation Center** for research and development collaboration, technology transfer and investment
- Creating an **Uncrewed Aerial Vehicle (UAV) Industry and Ecosystem** owned by the Philippines
- Implementing **indigenous repair capability for military aircraft components**
- Enhancing the **Philippines Air Force's sustainment capability and aircraft availability**
- Providing world-class **space training experience** via proprietary curriculum taught by Lockheed Martin subject matter experts
